Six phases of change

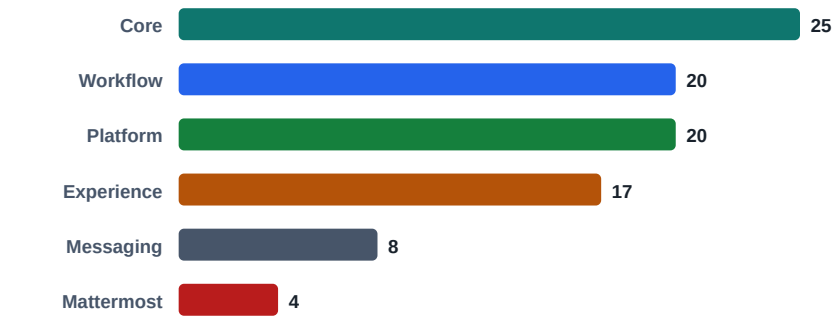

0.0.1-0.0.11 Aug 14-15 Foundation restored Proxy access, event titles, exports, audit logging, and the first systematic release trail.	0.1.0-1.2.2 Aug 16-17 MOED takes shape Modern identity, Chron, search, presentations, calendars, descriptions, and engagement maps.	1.3.1-1.4.9 Aug 18-22 Operations hardened Follow-up queues, profiles, backups, security controls, validation, geocoding, and resilience.
1.5.0-1.7.6 Aug 22-25 Workflow platform User lifecycle, inbound mail, Chron coverage, the User Manual, SMTP reliability, and mobile agenda work.	1.7.7-1.7.18 Aug 26-30 Deployment and polish Portable deployment, work digests, authoritative markers, responsive forms, tasks, and browser identity.	1.8.0-1.10.0 Aug 31-Sep 1 Connected collaboration Tracked correspondence, Mattermost integration, routing-marker copy, and MOED email from channels.

Where the development effort concentrated

The release summaries show a project moving from workflow depth and platform reliability into messaging and Mattermost collaboration.

Release-stream observations

Two peak days
August 17 and August 22 each recorded 16 releases, together accounting for 34% of the full period.

Largest version family
The 1.7 line contains 19 releases spanning deployment, email reliability, mobile usability, tasks, contacts, and branding.

Fast integration finish
The final 28 hours moved from tracked correspondence to Mattermost, routing-marker copy, and channel-based MOED email.

Repository state. Local main and the s1 deployment are on 1.10.0 / b23159e7. GitHub and GitLab main currently end at 1.9.8 / a3941f8d.

All 94 recorded releases

Newest first. Times are Central Time. MOED uses version metadata changes rather than semantic release tags; the ledger records each observed transition. Version gaps such as 1.6.5 to 1.6.13 reflect the repository history exactly.
